“THE PERFECT CUP OF COFFEE”

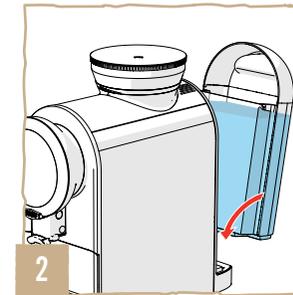

COMPACT, STYLISH AND POWERFUL

The GIRO is a beautiful, stylish and compact machine, especially developed for JDE Professional. Just like a real barista, you can now serve up a perfect cup of espresso or black coffee and delicious variations with fresh milk. Experience the convenience of a home coffee machine with the quality of a professional machine. This leaflet describes how to install the machine and immediately enjoy your first cup!

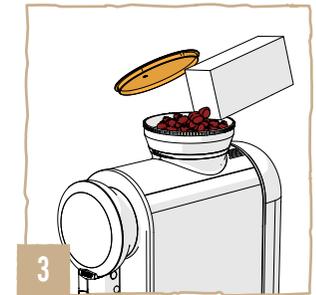

STEP-BY-STEP TO YOUR FIRST CUP

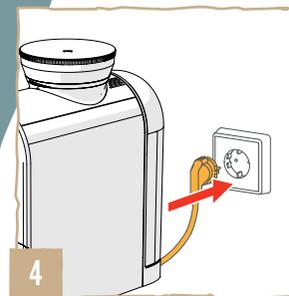

Remove the film from the display.

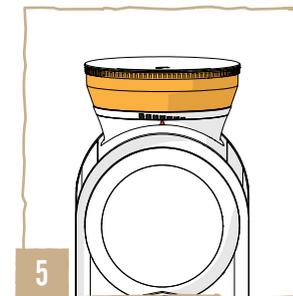

Fill the water tank (on the back of the machine).

Fill bean canister (at the top).

Switch on the Giro by inserting the plug into the socket.

The grinding wheel has been set for the perfect flavour.

Follow the step-by-step installation procedure on the display.

STEP-BY-STEP INSTALLATION

1

Start the installation: wait for the language selection screen to appear.

2

Select your language: press < or > and press start to confirm.

3

Read the instructions and press start or < to return.

4

Select the volume units: press < or > and press start.

5

Indicate whether you use a water filter. Select yes or no by pressing < or > and press start.

6

Measure the water hardness with the strip provided and select by pressing < or > and press start.

7

How do you prefer your coffee? Press start to choose a profile.

8

Press < or > to select a profile and press start.

9

Indicate whether you use fresh milk. Connect the milk hose and select yes or no using < or >. Press start.

10

If you are using fresh milk, fill the cooler with fresh milk and press start.

11

To flush: place a mug or container (of no less than 250 ml) under the outlet.

12

Flushing: the display flashes orange and black, and the GIRO starts flushing after a few seconds.
